2018	10	20	30	40
2019	15	25	35	45
2020	20	30	40	50
2021	25	35	45	55
2022	30	40	50	60

The data shows a consistent upward trend in all four quarters from 2018 to 2022. The values for each quarter increase by approximately 5 units per year. For example, the Q1 values range from 10 in 2018 to 30 in 2022, while the Q4 values range from 40 in 2018 to 60 in 2022.

Further analysis of the data reveals that the growth rate is uniform across all quarters. The difference between consecutive years for any given quarter is constant, indicating a linear relationship between time and the measured values.

Conclusion: The data exhibits a clear and steady linear growth pattern over the five-year period.
